

Custom Built WINDOW & DOOR SYSTEMS, INC.

Care and Maintenance of a FiberTuff Woodgrain Entry Door

Thank you for your recent purchase of a pre-finished FiberTuff Entry door system. Properly maintained, this entry door will provide years of beauty for your home. The door has been factory stained and a clear coat of exterior polyurethane has been applied. Like a wood product, proper care must be employed in order to retain its striking finish.

Due to the effects of Mother Nature, especially the sun, it is necessary that the exterior surface of the door is re-coated with urethane every 12 months (assuming the exterior has been stained). Custom Built suggests premium quality ZAR ultra polyurethane. It is an exterior, oil-based, fast drying polyurethane that provides superior ultraviolet protection. Follow the instructions on your particular can as exact directions may vary slightly between manufacturers.

If you have purchased a door and have chosen to stain it yourself, please follow the instructions provided by the stain's manufacturer.
