Why Custom Built Window and Doors

- Exceptional customer service.
- We stand behind your purchase.
- Quality products and great prices.
- Years of experience helping customers find the right door.
- Customer satisfaction.

Custom Built is a family-owned window and door replacement company founded in 1961 that has been providing quality services for 57 years. Unlike every other window and door contractor in New England, we manufacture our own products. You can count on the door or window we install to be made by us and personalized to your home specifications. You won't have to deal with middlemen when you work with us.

Since personalization is one of our focuses we pride ourselves on offering a wide variety of options for our customers. These options range from color and material to glass insert and hardware options. We are also happy to offer free estimates. One of our skilled installation technicians will pay you a visit and help guide you through the process. Contact us today to schedule your free estimate!

Why Therma-Tru® Doors

Uncompromising quality, inside and out.

#1 Among Building Pros

It's a brand you can trust. Why? Because year after year, building professionals rank Therma-Tru #1 – as the brand they prefer most – in entry doors.*

Experience & Know-How

Behind every Therma-Tru door stands decades of experience and technical know-how. Therma-Tru makes or recommends every aspect – from the glass to the hinges – to bring your home durability and reliability through the years.

The Power of Curb Appeal

Open the door to increased value with a stylish new Therma-Tru door. A new entry door can pay for itself – and then some – giving you and your customers more bang for your buck. Learn more at thermatru.com/curbappeal.

Perceived Value
A smart investment, a new Therma-Tru® entry door can increase a home's perceived value by **4.2%** or **\$18,750** on average.*

Return On Investment
Homeowners who choose a stylish new Therma-Tru® entry door can see **more than 2 times** the return on their investment.*

A smart investment.

Lifetime Limited Warranties

We stand behind more parts and for longer than other door companies because we make or specify everything that goes into our door system. A Therma-Tru fiberglass door system is backed by the industry's most comprehensive lifetime limited warranties.

Energy Efficiency

In any region or climate, energy efficiency is key. More than 80% of Therma-Tru door and glass options are ENERGY STAR® qualified and National Fenestration Rating Council (NFRC) certified, helping save money on energy costs.

Quality Testing

Our doors, glass and components are held to high standards. We conduct thorough testing to help ensure that our products will live up to a homeowner's toughest quality and performance expectations.

Engineered to Work Together

Our complete door systems feature doors, glass and components engineered to work together to resist leaks and drafts, and help maintain energy efficiency and weather resistance.

- 1 Weatherstrip** is engineered in a variety of profiles to provide the best possible fit with our door systems, helping to deliver a precise seal between the **door** and **frame**. In addition, a rot-free new Therma-Tru **composite door frame*** delivers extra protection from the damaging effects of moisture.
- 2 Sill and bottom sweep** form a tight seal against wind-driven moisture infiltration at the bottom of the door system and help channel moisture away from the home. **Sill pan** (recommended) adds an extra layer of protection to help keep moisture away from the subfloor.
- 3 Corner seal pads** (inswing only) complete the seal between the **sill cap**, **bottom sweep** and **weatherstrip** to help block potential pathways where wind-driven moisture can infiltrate the bottom corner of the door system.
- 4 Hinges** position the **door** to properly compress the **weatherstrip** to help form a tight, even seal against air and moisture infiltration when the door closes.
- 5 Multi-point locking system** (recommended) engages the **door** and **frame** at three points from top to bottom, helping to preserve the **weatherstrip's** seal even under wind pressure.
- 6 Lip-lite frame** (shown right) features a **compression seal** against weather on the outside of the **door** and an **adhesive seal** against weather on the outside of the **glass**. **Flush-glazed glass** (shown left) is built directly into the door without a Lip-lite frame, featuring a **high-performance adhesive weather seal** inside and out.

Key

☒ Tru-Defense Eligible

A Complete Door System

- Composite Door Frame***
A Therma-Tru composite door frame featuring Tru-Guard™ composite technology provides a rot-free solution engineered to work together with rot-resistant Therma-Tru doors and components.
- Composite Adjustable Sills** ☒
Inswing and outswing composite sills resist rotting and insects. Inswing adjustable sills help to maintain a tight seal over time.
- Dual-Bulb / Dual-Fin Bottom Sweeps** ☒
(Inswing Only) A dual-bulb, dual-fin design helps maintain tight contact with adjustable sill caps and creates added barriers against moisture.
- 7-Shape Corner Seal Pads** ☒
(Inswing Only) Innovative options include our patented jamb assembly, featuring the 7-shape corner seal pad which creates an air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.
- Removable Weatherstrip** ☒
Resilient design compresses when closed and springs back when open, protected by a durable jacket, for long-lasting sealing power.
- Multi-Point Locking Systems** ☒
(Recommended) Increased engagement between door and frame enhances stability and the homeowner's sense of security.
(Highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.)
- Ball-Bearing Hinges** ☒
Hinges with ball bearings protecting each hinge pivot, or "knuckle", offer added support and stability.
(Recommended for Classic-Craft® doors, 8'0" doors, doors with glass, and Impact-rated fiberglass doors.)

Additional components:
Sill Pans ☒, Rain Protection ☒, Strike Plate and Astragals ☒.

*Not based on actual home sales. Not a guarantee of investment returns, increase in value or selling price. Based on a nationwide survey of consumers' estimates of perceived home value based on exterior appearance. Results may vary based on region and home style. Therma-Tru's "National Home Valuation Study" was commissioned by Therma-Tru in 2015 and conducted by TNS, an independent provider of internet-based research. Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions, and ENERGY STAR qualified products. Top Right: Smooth-Star, Axis Glass, Door – S1652, Sidelite – S1652SL

*See your Therma-Tru seller for details on product availability.

EnLiten™ Flush-Glazed Designs

For Classic Craft®, Fiber-Classic® & Smooth-Star® Doors & Sidelites

Simplified beauty. Resilient designs. With clean lines and seamless construction, EnLiten flush-glazed designs are perfect for today's homes. Built for long-term performance, these doors and sidelites feature the sleek looks homeowners want and the stylish around-the-home solutions they need. Look for the (▲,△) icons.

Front Entry

Utility Door

Patio Doors

Front Entry

See the difference.

EnLiten flush-glazed designs provide a simple profile with no added embellishments around the glass.

Flush-Glazed Glass with Detailed Sticking ▲

Flush-Glazed Glass with Square Sticking △

Lip-Lite Frame

Maximum views.

Create an airy, open feeling in the home with larger daylight openings. EnLiten™ flush-glazed designs offer up to a 16% increase in visible glass area than conventional lite frames.

Flush-Glazed Glass

Lip-Lite Frame

*Comparison of U-factor values of a flush-glazed full-lite door and a Lip-lite full-lite door, both with Low-E glass.
**Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Impact-rated products not available.
Top: Classic Craft Fir Grain, Low-E Glass with SDLs, Doors – CCA2370
Right Page Top Left: Fiber-Classic Oak Collection, Low-E Glass with GBGs, Door – 2150, Finish – Raven
Right Page Bottom Left: Smooth-Star, Low-E Glass, Doors – S2000
Right Page Right: Smooth-Star, Low-E Glass with SDLs, Door – S4816, Sidelites – S2000SL

Durable by design.

Double- or triple-pane glass is built directly into the door with a high-performance dual adhesive weather seal. This delivers a clean seamless look with no lite frame or screw plugs, and reduces the potential for air and water infiltration, among other benefits.

Superior Sound Dampening
Doors with flush-glazed glass do a better job of dampening outside noise compared to a Lip-lite alternative.

11% More Energy Efficient
The Low-E glass used in flush-glazed doors delivers a clear view and is 11% more energy efficient than 1/2" Low-E glass in a Lip-lite frame.*

Withstands Winds Up to 167 mph
Door systems with flush-glazed glass are designed and tested to withstand wind forces up to 167 mph (DP-50).** (ASTM-E330)

Warranty riders for peace of mind.

EnLiten™ Flush-Glazed Rider for Construction & Installation

Provides protection in case of accidental glass breakage during residential and multi-family construction or installation. Therma-Tru will replace the flush-glazed fiberglass door or sidelite.

EnLiten™ Flush-Glazed Rider for Homeowners

Provides protection in case of glass-related failures due to manufacturer defect. Therma-Tru will furnish \$300 toward installation and replace the flush-glazed fiberglass door or sidelite.

Transoms

Door Swing & Handing

Find the door swing and handing needed for your home.

Options include inswing and outswing for right- and left-handed operation.

PrismaGuard® Premium Stain

Handcrafted and professionally applied in a controlled environment, low-maintenance PrismaGuard® finish preserves your door's lasting beauty and protects against normal wear and tear, saving you time and money.

And it's backed by a 10-year limited finish warranty for your peace of mind.

- 1 It starts with the realistic wood grains and deep embossments of a Therma-Tru® door, composite door frame or door surround.
- 2 A base coat provides an even, consistent color across the surface.
- 3 A wiping stain enhances the base coat while adding dimension to reflect the natural beauty of wood.
- 4 A durable topcoat enhances the high-definition color while protecting against scratches and color fading.
- 5 A second application of the topcoat provides added durability and optimal sheen for a high-end look.

Explore a nature-inspired color palette of premium stain and paint designed to enhance the overall beauty of the entry.

True-to-Wood Origins

Revel in the handcrafted look and feel of a premium fiberglass entryway with true-to-wood origins. Discover exquisite textures with grains hand selected from the finest natural wood species and meticulously recreated with our revolutionary AccuGrain® technology.

Fir Grain

Formerly Classic-Craft American Style

Designed to echo the grain of the largest species of American Hemlocks – the Western Hemlock tree – found in lush coastal rainforests of the Pacific Northwest.

NEW

Walnut Grain

Crafted to reflect the prized hardwood of the mighty Black Walnut trees, these doors feature a horizontal grain with natural movement accented by delicate arches and cathedrals.

Mahogany Grain

Formerly Classic-Craft Mahogany & Rustic

Derived from the finest African and Honduran Mahogany, blending rustic influences with exotic roots to build upon the rich history of one of the most renowned woods in the world.

Oak Grain

Designed to emulate the unique characteristics of Red Oak trees, embodying the look and feel of one of the most popular wood grains of all time.

Canvas

Inspired by the world’s most exquisite masterpieces and designed with the architectural character of finely sanded wood.

Industry-leading warranties for peace of mind.

Uniquely designed by Therma-Tru, Classic Craft complete entryway systems are backed by an industry-leading 1x transferable lifetime limited warranty from the entry door brand building professionals choose most.* This comprehensive lifetime limited warranty can be transferred one time to a new owner, should you ever sell your home.

In addition, Classic Craft entryways with our handcrafted and professionally applied PrismaGuard® premium stain or paint are backed by a transferable 10-year limited finish warranty – Therma-Tru’s best. The balance of this finish warranty can transfer to a second owner.

Learn about our industry-leading warranties at www.thermatru.com/warranty.

*Brand Use Study, 2020 *Builder* magazine.
Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions.
Below: Classic Craft Fir Grain, Low-E Glass with SDLs, Door – CCA220, Dentil Shelf

Premium construction, inside and out.

Highlighting the best of craftsmanship and innovation, Classic Craft® premium entryways boast impressive, well-designed features and remarkable construction. The inner workings of each Classic Craft door lay the foundation for exceptional strength, security, energy efficiency and long-term performance you can depend on for years to come.

Engineered for Moisture Protection

Features composite top and bottom rails and solid hardwood edges for increased moisture and rot protection all the way around the door.

Designed with Authenticity

Features construction identical to wood doors with narrow stiles and rails, and flush-glazed glass options that are more than 10% wider* to welcome more natural light into the home.

Tested to Withstand Mother Nature

Designed and rigorously tested to withstand and protect from the damaging effects of harsh weather conditions.

Thermo-Tru® Door Frame

Created specifically for Thermo-Tru doors to deliver an entire entry system designed and engineered to work together to resist leaks and drafts, and help maintain energy efficiency and weather resistance.

Designed for Long-Term Performance

Features fiberglass skins that are 46% thicker* for added durability and better long-term performance.

Triple-Pane Construction

Most decorative, privacy and textured glass panels are enclosed between tempered glass, offering superior quality and thermal performance.

Crafted for a True-to-Wood Appearance

Revolutionary AccuGrain® technology replicates authentic natural wood textures for a look and feel that is virtually indistinguishable from real wood.

Built for Strength and Security

Constructed with a 4" wide board of engineered lumber that runs the full length of the locking side of the door for a solid natural wood feel that makes Classic Craft doors 50% stronger and 30% heavier.*

Constructed for Energy Efficiency

Built with a high-performance polyurethane foam core that is four times more energy efficient than wood.**

*Comparison of Classic Craft to other standard fiberglass doors with similar styles. Visit www.thermatru.com for details.

**Comparison of R-Values of fiberglass to wood doors (both without glass).

Fiber-Classic® & Smooth-Star® Door Options

Fiber-Classic® Doors

Get the look and feel of rich Mahogany or warm Oak with excellent performance and value.

Smooth-Star® Doors

Get a smooth surface for plenty of color options with exceptional performance and value.

Door Construction

Fiber-Classic® & Smooth-Star® Doors

- 1 Weather Resistance**
Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.
- 2 Security**
An enhanced lock block combined with a 1-¼" engineered lumber lock stile increases rigidity and stability.
- 3 Durability**
With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.
- 4 R-Values**
Built with a polyurethane foam core, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency, offering up to four times the insulating R-Value of wood.*
- 5 Optional Composite Edge**
Tru-Guard™ composite edges are engineered to work together with composite top and bottom rails and durable fiberglass door skins to help protect from water absorption and rot on all six sides.

*Comparison of fiberglass to wood doors (both without glass).
Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions, and ENERGY STAR qualified products.

S Schlage®

HARDWARE

F58

The F58 is an exterior facing handleset. It has locking capabilities, however, it does not include any interior lever or knob set. Therefore, it is used in conjunction with the F59. An F58 includes the grip outside deadbolt trim.

F59

The F59 is an interior facing deadbolt and knob/lever. It does not include any locking capabilities for the exterior, therefore it is used in conjunction with the F58. The handing of the lockset is always viewed from the exterior of the door. The F59 includes the inside knob or lever, inside deadbolt trim, deadbolt, latch, screws, and strikes.

BE365

The BE365 is an electronic battery operated keypad deadbolt. It cannot stand alone as a locking system since it has no knob or lever to open the door. While it can be used with any knob or lever set, it is sold in conjunction with the FE285 handlesets as an entry door option.

FE285

The FE285 is a knob or lever set that has no locking capabilities which means it cannot stand alone. Therefore, it is used in conjunction with the BE365. Combined together, they create a front entry set. It is important to remember that the Accent and Flair levers are handed from the exterior view. The handing must be specified at the time of order. The FE285 is available in four different combinations. The exterior style is available to match the style of the BE365 while each style has an accompanying knob and lever available.

F-Series Available Finishes

Schlage's hardware finishes are designed to complement the fixtures and style in a home.

Multi-Point Locking Systems (MPLS)

Hinges position the door to properly compress the weatherstrip and help ensure smooth operation. Features options to suit various applications and mate with mortise pockets machined into our doors. Adjustable security strike plate wraps around the jamb and engages the frame for added support and strength, and resistance against forced entry.

Sill Protection

Sill Covers (Recommended)

- Fits over the sill to help protect cap and finish from damage during installation.
- Made of a heavy-duty material to withstand wear.
- Available in a variety of options to fit our sills.

Sill Pan (Recommended)

- Fits between the sill and subfloor for an added layer of protection against moisture.
- Engineered with sloped channels to help collect and drain moisture away.

Allow for a tight seal to help block wind-driven moisture infiltration at the bottom of the door. Available in a variety of materials with features to meet the needs of different climates and exposures. Ask your Reeb representative for a complete list of options.

Inswing Options

Composite Adjustable Sill

- Recommended for any in-swing application in any exposure.
- Available in the largest selection of color and size options.

Hardwood Adjustable Sill

- Only recommended for use in fully protected doorways.
- Limited selection in color and size options.

Basic Composite Adjustable Sill

- Recommended for any exposure.
- Very limited in color, size and configuration options.
- Budget friendly.

Basic Fixed Sill

- Non-adjustable sill.
- Limited in color, size and configuration options.
- Budget option.

Continuous length with spread mullion capability to fill 49"–75" rough openings.*

Outswing Options

Composite Outswing Sill

- Recommended for any out-swing application in any exposure.
- Available in the largest selection of color and size options.

Aluminum Sill with Thermal Break

- Budget friendly.
- Limited in color, size and configuration options.

Coastal Sill (For Coastal Regions)

- All aluminum construction.
- Extra-high cap profile.
- Integrated weatherstrip.
- Helps meet code requirements in HVHZ coastal regions.

Inswing Sill Extenders

Outswing Sill Extender

Finishes:

Public Access Sill

with Thermal Break (For ADA Applications)

- All aluminum construction.
- Ramp slope meets Americans with Disabilities Act (ADA) requirements.
- Also available without thermal break.
- Reeb stocks additional sill options available for use in varying exposure applications.

Door Frames

On-Guard™ Composite Frames

Composite door frames combine the strength and convenience of wood with enhanced properties that make it moisture, rot, and insect resistant giving the maximum level of protection for the entire door unit.

On-Guard™ Composite Frames:

- Feature a limited lifetime warranty
- Will not warp, splinter or rot
- Will not absorb water
- Require less maintenance than solid wood

On-Guard Primed

On-Guard Straight Grain

On-Guard Oak Grain

On-Guard White Cap

Therma-Tru® Door Systems

Independent Laboratory Performance Testing

At the time of manufacture, Therma-Tru exterior door systems (properly assembled with all genuine Therma-Tru components) have been tested under one or more of the following performance specifications: structural load, uniform load deflection, vertical load resistance, air infiltration, water penetration resistance, forced entry resistance, operating forces, force to latch, deglazing resistance, operating cycle performance, impact resistance, sound transmission, thermal performance and solar heat gain performance. Therma-Tru exterior door systems conform to the applicable Performance Standards / Test Methods that may include ANSI/AAMA/NWWDA 101/I.S.2, AAMA/WDMA 101/I.S.2/NAFS, AAMA/WDMA/CSA 101/I.S.2-A440, ASTM E330, ASTM E547, ASTM E283, ASTM E331, ANSI/BHMA A156.2, AAMA 1304, AAMA 920, AAMA 925, ASTM E2068, ASTM F842, ASTM E987, ASTM E1300, ASTM E90, ASTM E413, ASTM E1332, ASTM E1886, ASTM E1996, PA/TAS 201, PA/TAS 202, PA/TAS 203, HUD UM89, AAMA 1702.2, 24 CFR 3280, 24 CFR 3282, NFRC 100 and NFRC 200. Refer to www.thermatru.com for design pressure and other performance ratings.

Doors

Recommended Door Overhang – For best performance, all doors should be protected by an overhang. The recommended size is half the distance from the base of the door to the bottom of the overhang. So, as an example, a distance of 10' for this dimension would require an overhang of 5' minimum. For wetter climates, southern or western exposures, and for double doors, the overhang should be the same as the distance from the base of the door to the bottom of the overhang. In this same example, the dimension is 10' so the overhang should be 10'.

For best performance, double doors to be used in areas with severe weather exposure must be installed using entry alcoves or large soffit overhangs to protect entry unit from exposure. Multi-point locking systems are highly recommended for 8'0" and double door applications.

Doorlites

Doorlites are insulated, and exposed panes are tempered or laminated. Optional wood grilles available for clear doorlites and transoms.

Inserts – All glass (except flush-glazed styles) shall be bedded with glazing mastic and secured in doors with screws. Therma-Tru's SMC and BTS doorlite frames are available for most styles except where noted. SMC and BTS frames shall resist significant deformation by heat up to 200 degrees Fahrenheit, regardless of paint or stain color or placement behind a storm door.

PVC doorlite frames must be finished within 30 days of installation. Failure to do so will increase the chance for product damage of the type that is not covered by the warranty. PVC doorlite frames are not recommended for use behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Decorative Glass & Wrought Iron – Each Therma-Tru decorative glass unit is handcrafted by skilled artisans replicating Old World techniques. Each piece is a unique work of art and many things that would appear to be imperfections (small bubbles, lines and waves within the glass) are normal and are part of the designs character.

Condensation occurs naturally in the home, caused by excessive humidity in the air. Often this harmless water vapor can be seen collecting on glass surfaces, such as doorlites. Energy-efficient glass units in Therma-Tru door systems are constructed to keep the glass as warm as possible, reducing condensation build-up. However, there is no such thing as a condensation-free window or doorlite in high-humidity conditions.

A common attribute of true wrought iron doorlites is that a rattle sound may be heard when closing the door. This is solely a function of having real wrought iron which is heavy and has the ability to flex, moving back and forth within a narrow airspace surrounded by glass that has very little flex. This characteristic is not considered a defect or warranty issue.

NOTE: Glass privacy ratings are determined by the 1/2-lite glass size. As a result, the amount of privacy / glass transparency may be more or less than indicated by the privacy rating, based on the glass design and size of the glass that is inserted into the door, sidelite or transom.

Glass designs may differ from depiction due to the size and hand craftsmanship of glass. See your Therma-Tru seller or visit www.thermatru.com for more details.

Components

Adjustable Security Strike Plate – Proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16".

Hinges – Minimum hinge size 4" x 4" x .098".

Ball-bearing hinges are recommended for 8'0" doors, doors using heavy lites (e.g., wrought iron), all 20-Minute Fire-rated fiberglass doors, impact-rated doors and glass, and all Classic-Craft doors.

Use of the multi-point locking system is highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.

Please be aware that single door units built with public access sills have little resistance to water penetration, and double doors built with these sills have a potential to leak if installed exposed to weather. We recommend that units be installed away from weather under large soffits or overhangs.

Use of a sill pan is recommended.

Fiber-Classic and Smooth-Star dentil shelves are not recommended for placement behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Therma-Tru door surrounds must be finished within 30 days of installation. Failure to do so will increase the chance for product damage of the type that is not covered by the warranty.

Impact-Rated Products

Impact-rated products must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Visit www.thermatru.com for product approvals and full details on WBDR- (Wind-Borne Debris Region) / HVHZ- (High Velocity Hurricane Zone) compliant products. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

Fire-Rating Performance Standards

Fire and building codes vary throughout the country and acceptance of products and labels is left to the discretion of the local authorities.

MODIFICATION OF PRODUCTS DESCRIBED IN THIS BROCHURE WHICH CARRY FIRE RATINGS (DOORS AND FRAMES) MAY VOID THE FIRE RATINGS.

Test conducted by Intertek, Warnock-Hersey.

Limited Warranties

Please be aware of the applicable Therma-Tru Limited Warranty which contains important restrictions, disclaimers, exclusions and conditions, as well as the below listed Installation, Finishing &

Maintenance documents, related to the Therma-Tru product purchased (e.g., Fiberglass, Steel, Patio Door Systems), all of which can be obtained from your Therma-Tru seller or found in their entirety at www.thermatru.com:

- Therma-Tru. Fiberglass and Steel Door Systems Residential Limited Warranty: Fiberglass – Classic-Craft., Fiber-Classic., Smooth-Star. and Pulse. Door Systems; Steel – Pulse., Profiles., Traditions and Therma-Tru. Fire Door (TR 12-24) Steel Edge Door Systems

- Therma-Tru. Tru-Defense. Door System Rider to Fiberglass Door Systems Limited Warranty: Classic-Craft., Fiber-Classic., Smooth-Star. and Pulse. Fiberglass Door Systems

- EnLiten., Flush-Glazed Construction & Installation Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft., Fiber-Classic. and Smooth-Star. Flush-Glazed Fiberglass Door Systems

- EnLiten., Flush-Glazed Homeowner Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft., Fiber-Classic. and Smooth-Star. Flush-Glazed Fiberglass Door Systems

- PrismaGuard. Limited Warranty Rider to Fiberglass and Steel Door Systems Limited Warranty for Residential and Multi-Resident Premises: Fiberglass – Classic-Craft., Fiber-Classic., Smooth-Star., and Pulse. Door Systems; Steel – Pulse., Profiles. and Traditions

- Same-Day. Stain 5-Year Limited Warranty: Same-Day. Stain and Topcoat for Use on Therma-Tru. Fiberglass Door Systems and Fypon. Stainable Polyurethane Products

- Therma-Tru. Composite Door Frame featuring Tru-Guard. Composite Technology Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft., Fiber-Classic., Smooth-Star. and Pulse. Fiberglass Door Systems

- Therma-Tru. Composite Door Frame featuring Tru-Guard. Composite Technology Limited Warranty Transferrable Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft., Fiber-Classic., Smooth-Star. and Pulse. Fiberglass Door Systems

Installation, Finishing & Maintenance

Installation, finishing and maintenance must be performed according to Therma-Tru's recommendations to comply with warranty requirements. Obtain a copy of the following documents outlining recommendations from your Therma-Tru seller or find them in their entirety at www.thermatru.com:

- Installation Instructions (Products that are approved for Coastal and / or high wind applications may require special installation. Always follow the installation instructions in the Product Approval for these products.)

- Therma-Tru Fiberglass and Steel Door Systems Recommendations for Proper Finishing and Painting or Staining

NOTE: Finish colors may vary from an actual application due to fluctuations in finishing or the printing of this catalog. See your Therma-Tru seller or visit www.thermatru.com for more details.
